Video Index

At present the UBHS video files are available only on DVD. Original VCR tapes have been converted to digital format for DVD distribution -- the digital file formats on the DVDs are a mix of .mp4 and .VOB

Initially, none of the DVDs have been edited; they contain the files just as they were extracted from the VCR tapes. Those that have been cleaned up and edited will have the word "Edited" in their index description and will be in .mp4 format only. With the unedited versions it's possible they've been misnamed, there may be duplicate copies of the same presentation, and the same presentation may be shown from different camera angles.

To obtain a video DVD send an email to admin@ubhistory.org giving the name of the DVD. There is a \$10 charge for each DVD which includes the cost of producing the DVD, its shipping and handling.

Select from either:

Editing UBHS Video Files

You should have prior experience in video editing and must be able to edit both .VOB and .mp4 digital formats. Request that a copy of a DVD from the UBHS DVD Index be sent to you.

EDITING:

- Insert a title at the beginning of the video (if it doesn't have one) that contains the presentation title, date of event, location of event, duration of video, names of presenters.
- Merge various camera angles or various versions of same presentation to make the new version interesting to watch.
- General video editing, fade in, fade out, video effects.
- Insert a closing page containing your name and date of editing.
- Produce one file out of the several originals for each separate presentation. The one file goes on one DVD in .mp4 format.
- Write up a description and evaluation of the presentation that will help others know whether or not they'd be interested in this video.
- Put a label on your new edited DVD and send it and the description back to the UBHS.
